

## Product Description

A sustainable, light, easy to work and safe sandy loam ideal for general landscaping projects such as seeding, turfing or planting.

**Textural Classification:** Sandy Loam – Sandy Silt Loam

## Product specification

British Sugar's Landscape20 is analysed against a general landscaping specification. This specification has been built by an independent soil scientist using the "Contaminated Land Exposure Assessment Model" (Clea) new soil guideline values (SGV) and BS3882:2007).

An independent laboratory conducts the analysis and reporting.

## A typical analysis would be:

pH	7.5 – 8.2
Electrical Conductivity $\mu\text{S/cm}$	< 2800
Moisture Content not greater than	20%

## Organic Matter & Nutrient Status

Organic matter %	> 3% Loss on ignition
Total Nitrogen %	> 0.2%
Extractable Phosphorus mg/l	>14
Extractable Potassium mg/l	>121
Extractable Magnesium mg/l	>26
Stones > 2mm	10% maximum
Stones > 20mm	5% maximum
Stones > 50mm	0% maximum

## Weeds & Foreign Matter

Landscape20 is free of perennial weeds, bulk vegetative growth, fragments of glass, bricks, concrete, metal or other potentially hazardous foreign matter above a size of 20mm.

Landscape20 does contain annual weed seeds

Note: Electrical Conductivity 1: 2.5 CaSO<sub>4</sub>

Landscape20 is a natural product and this specification represents a typical sample and may not exactly match the Landscape20 you receive.

British Sugar makes no warranty about the accuracy of the information supplied in this document. If a more specific analysis is needed a site visit is recommended to discuss your customer's requirements.
